

TUNNELWORKS BTEC LEVEL 2 STUDENT SHEET 1

What PPE should a site visitor wear?

- Identify some hazards on a busy engineering construction site.
- Choose the right PPE for a visitor to wear.
- Explain your choices and suggest how else a site manager can help visitors stay safe on site.

Safe on site

All staff, and any visitors, must stay safe on a busy engineering construction site. Your site manager wants some visitors to see the engineering workshop buildings where staff maintain and repair TBM parts.

- Think about some hazards that might exist in the workshops, and when walking between buildings on site.
- Use the information on the Scenario sheet and in the slides to help you.
- Write down your ideas.

What PPE do you recommend?

Your Personal Protective Equipment (PPE) store contains:

Hard hat

Safety glasses

Respiratory Protection
(Face Mask)

Gloves

Work boots

Ear protection

Overalls

High-viz jacket

- Choose the right PPE for staff and visitors..

Things to think about

- What laws and regulations govern the PPE people should wear?
- Who could be a 'competent person' to make decisions about PPE, and what would qualify them for this?
