## GREENWICH PUMPING STATION

### ACOUSTIC ENCLOSURE UPDATE

A majority of the acoustic enclosure's cladding is complete. A section has been left temporarily uncovered for the gantry cranes to be lifted inside.

We plan to start installing the gantry cranes later this month, followed by the final section of cladding on the acoustic enclosure.

This will include around two weeks' further night works for activities close to the Docklands Light Railway (DLR), as they need to take place when the DLR is not operational (approximately 00:30 / 01:30 to 05:00). Preparatory works such as moving cranes, setting up and closing down activities are permitted between the hours of 22:00 and 07:00.

Some of this work may be noisy. We apologise for any disturbance and will do our best to minimise disruption.

### SHAFT EXCAVATION

Before the gantry cranes are installed, we will start excavation of the shaft, which consists of digging and removing material using excavators until we get to a depth of 51 metres.

There is an old concrete cooling pond around 5 metres deep within the shaft which will need to be removed by breaking out the concrete. This work will take place in normal working hours.

In April, once the acoustic enclosure is complete, we plan to start continuous working within the enclosure to excavate the shaft, 24-hours per day, Monday to Friday.

The doors of the enclosure will be closed for the night from 18:00, although there may be occasions when they are re-opened in the evening (up to 22:00) for plant movements. There will be no vehicles removing spoil after 18:00.

We provide further updates via email, please contact [getinvolved@tideway.london](mailto:getinvolved@tideway.london) to sign up.

## KEY INFO

### WORKING HOURS

- Normal: Monday to Friday: 08:00 – 18:00, Saturday 08:00 - 13:00
- Night: Monday to Sunday: 22:00 – 07:00
- Up to one hour start up and shut down periods permitted

### WHAT TO EXPECT

- Excavation of the shaft

- Concrete breaking inside the shaft
- Night works to install the gantry cranes and remainder of cladding on the acoustic enclosure

### WHAT WE WILL DO

- Continue to monitor noise and dust levels and use best practice to minimise any nuisance
- Hold regular Community Liaison Working Group meetings
