- Noise & Vibration Specialist

The Panel:

- Considered 16 matters in total, comprising 15 base plug pour at Chambers Wharf one special medical case.
- These matters were associated with Tideway works at:
 - Chambers Wharf
 - Carnwath Road

Chambers Wharf – Base Plug Pour

The Panel considered a further 15 applications in June for respite during the proposed base plug pour at Chambers Wharf. The Panel took into account the proposed routing of vehicles during the base plug pour. The Panel agreed that, on a precautionary basis, although the pour is scheduled to take less than 36 hours, that where awards are made they should be for two night's temporary accommodation to minimise disruption to those awarded respite.

The Panel reviewed:-

1. A map which illustrates the vehicle route to and from site and the approximately 420 properties which had received hand delivered mitigation leaflets. The area of distribution was discussed and agreed at the March CLWG.
2. The March CLWG slide pack which illustrated mitigation to be employed on site to minimise impacts during continuous concrete pour.

<https://www.tideway.london/media/2810/chawf-works-update-march-19.pdf>

this includes a plan of the site that shows all vehicle movements on site will take place to the west of the acoustic shed (none between the acoustic shed and Fountain Green Square).

3. Current Approved Section 61 (ref: 5700-CVBJV-CHAWF-151-TZ- PF-005107) & S61 variation (5700-CVBJV-CHAWF-151-TZ- PF-005830) which covers the current night time works and upcoming continuous concrete pour.
4. The Panel considered all cases where an application had been submitted prior to the date of the meeting and also other cases where the Panel was also considering at this meeting other matters on behalf of the resident in relation to current awards which were made until the shaft reached design depth.
5. A precautionary principle was applied.
