CHELSEA EMBANKMENT FORESHORE
WORKS UPDATE

Works at our Chelsea Embankment site are progressing well.

On Monday, 10 August 2020 we will commence construction of a de-aeration adit at the site. This is a small tunnel which connects the bottom of the shaft to a chamber which removes gases within the sewer system.

To construct this adit, we need to install a number of sheet piles deep into the ground within our cofferdam, the dry working area that we built into the river, around the perimeter of the structure. To install these piles to the required depth, we will use a combination of vibro and push piling.

The works are expected to take around three weeks to complete and will be carried out during core hours, 08:00 – 18:00, Monday – Friday and 08:00 – 13:00 on Saturdays.

If you have any queries during this period or wish to be kept up to date via email, please feel free to contact the Tideway 24hr Helpdesk 08000 30 80 80 or helpdesk@tideway.london.

Tideway is happy to provide information in other languages and formats such as braille or large print. Please contact the Helpdesk, as above, or you can also click here for more information.

KEY INFO

Key information here

What we will do:
- Continue to monitor noise and vibration levels
- Keep you informed of upcoming works

What to expect:
- Push and vibro piling operations.
