EARL PUMPING STATION

UPDATE ON CONSTRUCTION AT THE EARL SITE

We have removed the temporary concrete base at the bottom of the shaft and reached the permanent tunnel below. From now until the end of the year, shaft activities will be limited to occasional lifting for operations within the tunnel.

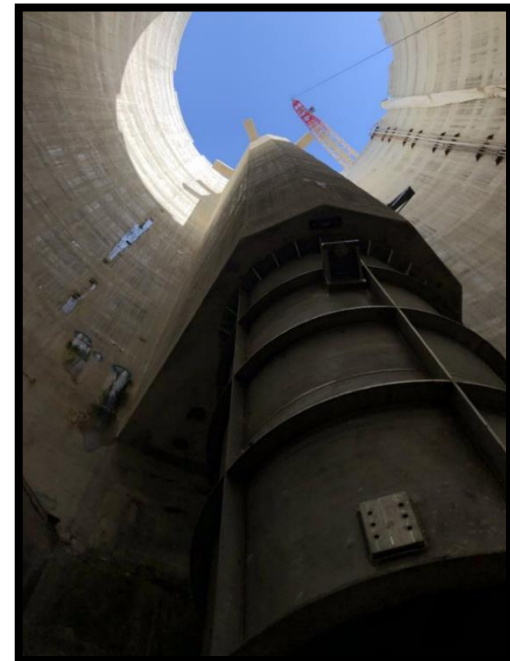

Excavation of the Combined Sewer Overflow (CSO) area has started and will continue until the Autumn. We will be breaking out ground (grouted soil) and removing it from the site. Dewatering will start once we have reached 3 metres deep.

Both CSO dewatering and excavation, to keep the ground dry, will take place during extended hours:

- Monday to Friday: 8 am to 8 pm
- Saturday: 8 am to 5 pm

We will continue using water mist to control any odours.

We try our best to minimise disruption. If you have any concerns about the impact of our work, we may be able to offer you support and advice. Please contact the Tideway Helpdesk: helpdesk@tideway.London about the Independent Compensation Panel process.

PLANNING SUBMISSION UPDATE

Tideway has now made a draft application to the London Borough of Lewisham for the detailed design of the permanent above ground works.

The application reference number is **DC/22/127383** with the closing date for comments on **25 July 2022**.

If you wish to comment on the proposals, you can find more information on Lewisham Council's planning page:

<https://lewisham.gov.uk/my services/planning>

Tideway can also provide information in other languages, or formats such as braille or large print. Please contact the Helpdesk.
