ACTON STORM TANKS – WORKS UPDATE

Works at our Acton Storm Tanks site are progressing well and we would like to update you on our next phase of works.

On Monday 28 November we will start the works to install the permanent site drainage within the boundary of our site along at the Canham Road end. Please see the diagram overleaf.

This work will involve the intermittent breaking out of the surface concrete slab and installation of the sheet piles needed where the drainage is going to be installed.

This work will be carried out Monday to Friday 08:00-18:00 and will be completed at the end of January 2023.

Acoustic blankets will be placed around the areas to minimise any disturbance and the strict monitoring of noise, dust and vibration levels will be in place at all times.

We know that this work may cause a disturbance which we apologise in advance for.

If you feel affected by Tideway's work, you can contact Tideway's Helpdesk and they will be able to advise you on the Independent Compensation Panel (ICP).

Tideway is happy to provide information in other languages and formats such as braille or large print. Please contact us: 08000 30 80 80 or helpdesk@tideway.london.
